

# Google and the SLP

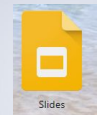

(Google Apps and Extensions to support the work of the SLP)

Amy Folk M.A., CCC-SLP  
Michelle Butler M.S., CCC-SLP  
Littleton Public Schools

## Today's Outcomes Learn how to use:

- Forms and Sheets for Data Collection, Teacher/Student Feedback
- Slides and images
- Apps/Extensions to increase productivity
- Apps/Extensions to engage students in and out of therapy

## Why Use Google Drive to Collect Data

\*Allows us to take data electronically on any device that can operate the Google Drive app!

\*No need to collect data on paper and no more making copies of data sheets.

\*Allows us to instantly share our data collection on students with parents, teachers, and/or other service providers.

\*To have a better understanding of how students are progressing on their IEP goals.

\*Instant feedback on how a student is progressing on their goals across all settings and classes.

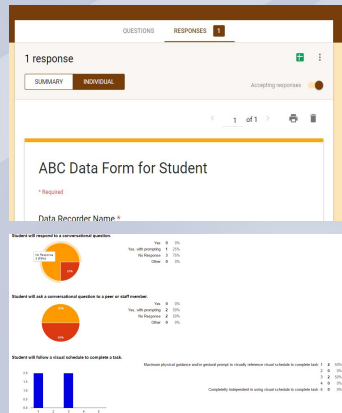

## How do I get started?

1. To open a new form click "Create" on the main Google Drive page and then click "Form".
2. It's recommended that the first question be the person's name completing the form.
3. The remainder of the questions are based on IEP goals.
4. Data can be collected through many different types of responses.

A screenshot of a Google Form question. The question text is "Student will respond to a conversational question." and the response type is "Multiple choice". The options are: "Yes", "Yes, with prompting", "No Response", "Other...", and "Add option". Each option has a radio button and a small 'x' icon to the right. A vertical toolbar on the right side of the form contains icons for adding questions, deleting questions, and other editing tools.

## How to view data from Google Form or from Google Sheets

- Click on Responses or click on the Sheets icon to see the data in a spreadsheet
- All data taken by every teacher is collected into Google Sheets. Each data point is time stamped. Click on Form and then Summary of Responses to see the data visually.

## Collecting Teacher Feedback

- Create Google Form to collect teacher feedback for evaluation purposes, check in on goals, etc.
- Important to make a copy of the form and rename form to include students' initials and date

## Collecting Student Feedback

- Use Google Forms to collect student feedback on a particular skill they are working on or using in the classroom setting
- This example is for a middle school student receiving consultative services to monitor his fluency skills

## Apps/Extensions to increase productivity

Extensity  
Tab Scissors  
Tab Glue

Google Keep  
Screenshot Capture  
Grammarly

## Apps/Extensions/Add-ons

Progress Bar Timer	Screencastify
Highlight Tool (Add-on)	1 Click Timer
Kami	Diigo Web Collector
Read&Write for Google (free for educators) and Snapverter	QR Code Generator

## Random other helpful tips

Open Specific Pages - Chrome settings

Right Click on tab to reopen closed tab

Ctrl: C (copy), V (paste), X (cut), Z (undo), L (highlight URL)
